

JANUARY

2020

PATIENTS

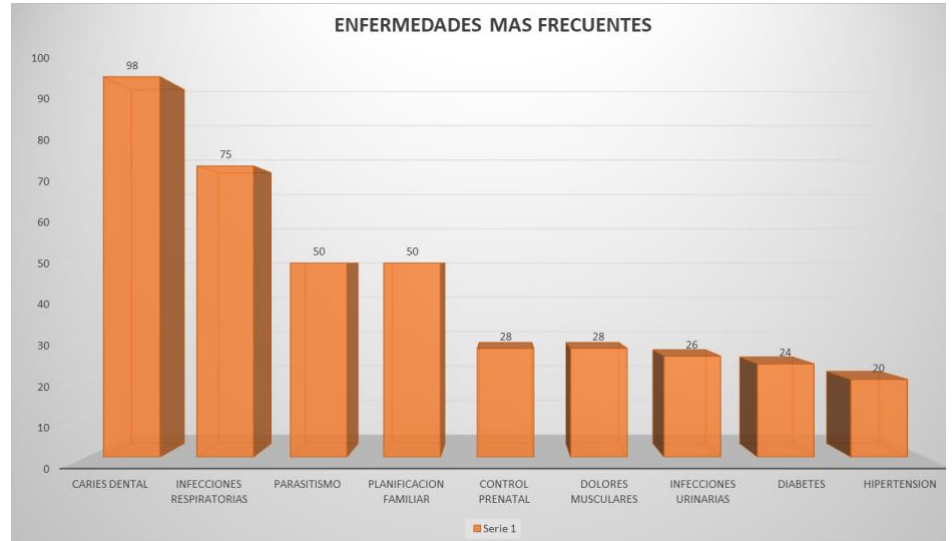

During the month of January of this 2020 we have been able to carry out our activities normally, the number of patients attended was 534, Of these, 315 were female and 219 male.

The highest number of patients were in the area of medicine (74%), followed by the dental clinic (18%), optometry patients 17 (3%), Physiotherapy is an area that we are restarting with 11 patients (2%).

Salud que Transforma

January Update

The most frequent reasons for consultation were dental caries, respiratory infections, parasitism, family planning, prenatal control, muscle pain, diabetes and hypertension.

Surgery Room

We thank God last year we managed to move forward with the surgery room, it has been difficult, but we are achieving it step by step.

Pray that God allows us to continue building and equipping our surgical room.
